WORK EXPERIENCE

- 01/25 – 01/26 Kai.com – Centralized Exchange focusing on Perpetual trading London, UK**
Finance Operation Manager / Finance Business Partner
- B2B2C White-Label Visa Program Lead: Launched a turnkey Visa solution for unlicensed B2B partners to issue branded cards. Engineered the crypto-to-fiat bridge to enable automatic USDT conversion for global Visa, Alipay, and ATM spending. Managed the full lifecycle from bank API integration to card production. I orchestrated complex fund flows while ensuring strict adherence to KYC/AML compliance frameworks
 - Payment Infrastructure & Digital Wallets Architecture: Integrated BVNK Embedded Wallet system supporting multi-rail payments. Integrated US domestic rails (ACH, Fedwire) and SWIFT via API. Designed the fund flow for seamless Fiat-Stablecoin conversion by Virtual Accounts, processing 5M+ volume
 - Strategic Resource Management: Executed the £300K financial settlement for the UPTX.com acquisition. Directed the DD process (AML, KYC, SPA) and managed project cash flows to allocate resources efficiently across growth initiatives. Partnered with operations to source liquidity providers
 - Reconciliation processes Reengineering: by bridging the gap between on-chain data (Udun/Binance) and accounting ledgers (Xero); utilized Cash Coding and Excel-based mapping to manage complex multi-currency bookkeeping and settlements for 165+ employees and affiliate partners
- 09/24 – 02/26 Bots and Bowls – Robotic KaaS Franchise with Innovative Tokenomic Business Model London, UK**
Co-Founder & Product Builder (<https://www.botsbowls.com>)
- Strategic Launch: Secured £100K in seed funding and launched an AI-robotic kitchen ("Future Noodles") in Barcelona, managing the full project lifecycle from procurement to launch
 - Business Model Innovation: Developed a scalable "Robotics-as-a-Service" + "Visa Tokenomic system" model, optimizing resource allocation and production efficiency through technical implementation
 - Technical Implementation: Architected scalable full-stack platforms using Next.js (App Router), TypeScript, Tailwind CSS with integrated Generative AI workflows. Managed the entire development lifecycle, from coding and testing to the CI/CD pipeline, ensuring delivery quality without dedicated engineering support
- 12/22 – 10/24 Teya – From payments, to loyalty, Teya provides one in all payment solutions for SMEs London, UK**
System and Data Operations (Nov 2023 – Oct 2024)
- Revenue Operations Automation: Spearheaded the digital transformation of financial reporting for 1,500+ employees. Utilized Workato (iPaaS for API, Webhook Configuration) to orchestrate workflows between Hibob (HRIS) and JIRA, automating payroll reconciliation, eliminating manual data entry errors
 - Process Engineering: Collaborated with IT to optimize the contractor on/off-boarding financial/HR workflows (Financial reconciliations, Time-off policies, Structure-MGMT), ensuring adherence to GDPR. Reduced 600+ tickets via the implementation of self-service Slack bots and automated approval chains
 - Commercial Analytics & Data: Designed and implemented a dynamic B2B Operations Dashboard with Advanced Excel, Jira DB, charting libraries (Revenue, COGS, Profit Margins) to drive business decisions
- Crypto Operation Associate (Gnosis Pay PM: Dec 2023 – Nov 2023) –The first self-custodial Debit Card**
- Product Launch & Strategy for Acquiring Tangem: Defined the Go-to-Market strategy for Self-Custodial Debit Card. Developed 18-month OKRs with DCF financial models, built financial statements for securing £500K internal funding to bridge decentralized assets with the Visa network (ISO 8583)
 - Cross-Functional Leadership: Orchestrated the integration of hardware wallets (Tangem) with traditional payment processors, ensuring compliance with PCI-DSS and FCA rules with seamless user experience
 - Forensic Compliance Investigation: Led a high-stakes forensic analysis on a 500K USDT suspicious transaction cluster. Leveraged MistTrack and OKLink to trace fund provenance across mixers and exchanges, providing actionable intelligence to legal teams and strengthening the firm's AML framework
- 08/20 - 03/21 AppWorks – Global VC community with 4.7B\$ raising funds and 435 active start-ups Taipei, Taiwan**
Venture Capital and Accelerator Analyst Intern (Tech, AI, Blockchain industries)
- Conducted 3 equity research, Pinterest, Square, Roblox, successfully published by AppWork Community

EDUCATION

- 2021 - 2022 Imperial College Business School London, UK**
MSc Finance and Accounting (Dissertation: Tokenomics Audit on Olympus DAO)
PEVC, Portfolio Management, Corporate Finance, Corporate deal-making, Valuation, Blockchain, Derivatives
- 2016 - 2020 National Taipei University | Hong Kong University of Science and Technology Taipei | Hong Kong**
Bachelor of Business Administration in Finance (GPA3.9/4)
(GMAT 710/800: Quant: 50/51, Verbal: 36/51, Percentile:93) *Financial Engineering, Futures and Options*
